

4/2 and 4/3 Directional Control Valve, Solenoid Operated

RPE3-06

Size 06 (D03) • Q_{max} 80 l/min (21 GPM) • p_{max} 350 bar (5100 PSI)

- Direct acting, directional control valve with subplate mounting interface acc. to ISO 4401, DIN 24340 (CETOP 03)
- High transmitted hydraulic power up to 350 bar with optimized design to minimize pressure drop
- > Five chamber housing design with reduced hydraulic power dependence on fluid viscosity
- > The valve is available with interchangeable DC solenoids, also for AC power supply using a built-in rectifier bridge
- > Wide range of solenoid electrical terminal versions available
- > Wide range of interchangeable spools and manual overrides available
- > CSA Certificate upon request 🛞

Technical Features

- > Inductive contactless Normally Open and Normally Closed spool position sensor option
- > Soft-shift spool speed control option
- > The coil is fastened to the core tube with a retaining nut and can be rotated by 360° to suit the available space
- In the standard version, the valve housing is phosphated and steel parts zinc-coated for 240 h salt spray protection acc. to ISO 9227
- > Enhanced surface protection for mobile sector available (ISO 9227, 520 h salt spray)

ISO 4401-03-02-0-05

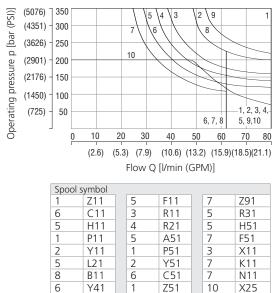

Technical Data

E13A

E12A with quenching diode

- For directional valves with two solenoids, one solenoid must be

de-energized before the other solenoid can be charged. - For AC voltage supply use coils with connector type E5.

- The orifice to the P port can be ordered separately, see data sheet SP_8010. - Mounting bolts M5 x 45 DIN 912-10.9 or studs must be ordered separately. Tightening torque is 8.9 Nm (6.56 lbf.ft). - Besides the commonly used valve versions shown other special models are available.

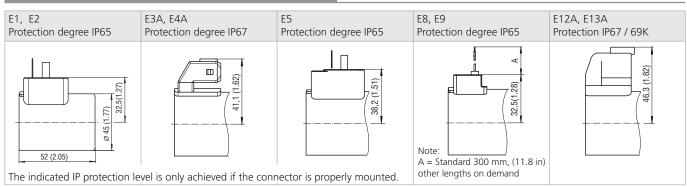

Contact our technical support for their identification, feasibility and operating limits.

Solenoid Coil in millimeters (inches)

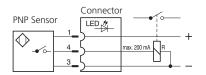

Manual Override in millimeters (inches)

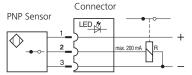

In case of solenoid malfunction or power failure, the spool of the valve can be shifted by manual override as long as the pressure in port T does not exceed 25 bar (363 PSI). For alternative manual overrides contact our technical support.

Spool Position Sensor

S1 - Circuit diagram for the normally - OPEN sensor

Function of the position sensor:

In the basic position (when the solenoid is switched off), a steel core, connected to the spool, is under the position sensor. The sensor is activated, it means contacts of the sensor S1 are closed and contacts of the sensor S4 are open. After switching on the solenoid the spool with core moves out of the sensor range and the sensor is deactivated.

Technical Data of the Sensor		S1, S4				
Rated power supply voltage	V	24 DC				
Power supply voltage range	V	10 30 DC				
Rated current	mA	200				
Sensor enclosure protection (EN 60529)		IP 67				
Max. operating pressure	bar (PSI)	210 (3046)				
Switching frequency	Hz	1000				
Ambient temperature range	°C (°F)	-25 +80 (-13 +176)				
Technical Data of the Connector						
Power supply voltage range	V	10 30 DC				
Ambient temperature range	°C (°F)	-25 +80 (-13 +176)				
Indicator		yellow LED				

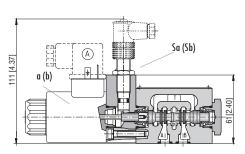

Typical configurations of the valve with a sensor:

3-position valve with two solenoids, equipped with two sensors

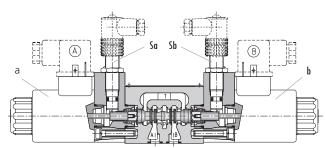

2-position valve with one solenoid, equipped with one sensor on the solenoid side

2-position valve with a detent assembly of spool, equipped with one sensor on the side of the solenoid which moves the spool from the basic position to the switched position according to the spool symbol Note: the sensor always indicates the change of spool position realised by the energised solenoid, mounted on the side of the sensor.
